

Analytical and detail-oriented Data Analyst with **4 years of experience** designing scalable data solutions and transforming complex datasets into actionable insights. Skilled in building automated **ETL pipelines**, developing real-time dashboards, and optimizing CRM and cloud-based data systems. Proficient in **Python, SQL, Tableau, Power BI, and Salesforce**, with a proven ability to streamline **data workflows** and improve reporting efficiency. Adept at collaborating with cross-functional teams to ensure **data accuracy, transparency, and measurable business impact**.

Skills

Programming & Scripting: Python, SQL, .NET, Apex, JIRA

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI (DAX), Tableau, Excel

Databases & CRM Tools: MS SQL Server, PostgreSQL, MySQL, Redshift, Salesforce CRM, Salesforce Reports & Dashboards, Salesforce Flow

ETL & Automation: Apache Airflow, Python Scripting, Salesforce Data Loader, AWS Glue, Data Profiling, Data Quality Validation, Reconciliation Rules

Machine Learning: Scikit-learn, Regression, Classification, Clustering, Gradient Boosting, Model Evaluation (ROC, F1-score)

Cloud & Platforms: AWS (S3, Glue, Lambda, Redshift), Google Cloud Platform (BigQuery, Cloud Storage)

Professional Experience

Optum (UnitedHealth Group)

– Data Analyst

Remote | Jul 2025 – Present

- Led the development of automated **ETL pipelines** using **Python, SQL**, and **Apache Airflow** to integrate **claims, provider, and encounter data** into Optum's **AWS** analytics environment, reducing manual processing time by **40%**.
- Designed scalable **dimensional data models (fact tables, dimension tables, SCDs)** aligned with Optum's enterprise data standards, improving reporting accuracy and data consistency across **12+ clinical workflows**.
- Analyzed large **healthcare datasets (EHR, claims, eligibility, utilization)** using **advanced SQL**, identifying anomalies and data quality gaps; improved data reliability by **30%** through systematic validation and reconciliation rules.
- Developed interactive **Power BI** and **Tableau** dashboards using **DAX** and complex **SQL** logic to track **population health metrics, provider performance**, and **clinical KPIs**, accelerating decision-making across clinical and operational teams.
- Collaborated with **cross-functional stakeholders** (clinical, actuarial, operations) to translate business requirements into clear **data specifications**, ensuring analytics outputs aligned with **regulatory reporting** and **value-based care** goals.
- Migrated legacy **SQL workloads** to **AWS** using **S3, Glue, Lambda**, and **Redshift**, reducing pipeline failures by **50%** and improving query performance for enterprise dashboards.
- Implemented **data profiling, lineage documentation**, and **quality checks** across staging and warehouse layers, enabling auditors and compliance teams to meet **HIPAA** and **CMS** reporting standards.

Montclair State University

– Research Assistant

Montclair, NJ | Jan 2024 – May 2025

- Spearheaded AI-driven data analysis at the **Collaborative Robotics and Smart Systems Lab (CRoSS)**, focusing on improving algorithmic transparency and human-robot interaction in educational settings.
- Evaluated existing data collection systems and collaborated with the development team to design conceptual and logical data models, improving **data flows** for AI experiments.

- Designed and maintained **Power BI dashboards with advanced DAX**, aligning visual reporting with optimized backend data models.
- Built automated **ETL pipelines** using **Apache Airflow** and **Python**, ensuring reproducibility and consistency across multiple research projects.

Accenture

– **Advanced App Engineering Associate**

Hyderabad, India | Jan 2022 – Aug 2023

- Optimized Salesforce data flows for **Kimberly-Clark's ANZ operations**, delivering real-time dashboards to support faster, data-driven decision-making by business stakeholders., providing visibility into sales pipeline, service performance, and customer engagement KPIs.
- Evaluated existing **CRM** and reporting systems, identifying gaps and redesigning data flows to enhance system performance.
- Built and optimized **ETL pipelines using Salesforce Data Loader and Python**, ensuring accurate cross-platform integration with backend systems.
- Designed and implemented data strategies to support long-term **CRM scalability, maintaining logical and physical models with accurate metadata**.
- Conducted variance analysis to detect discrepancies in operational data, reducing reporting inefficiencies and increasing accuracy by 25%.
- Collaborated in **Agile sprints**, proposing strategic solutions to data-related integration challenges while aligning with **Data Vault-style architecture principles** for sustainability.

Projects

Credit Card Fraud Detection (Kaggle Dataset)

- Developed and evaluated fraud detection models on 1.3M+ financial transactions using **Python, Scikit-learn, and Gradient Boosting**.
- Achieved 99.8% accuracy and an F1-score of 0.85, identifying Gradient Boosting as the most effective approach for real-world fraud detection use cases.

Fitbit Health Tracker Data Analysis

- Analyzed activity, sleep, and heart rate data from 33 users across a 30-day period using **Pandas and Seaborn**.
- Identified health and behavior patterns, clustering users based on activity intensity and lifestyle factors.

Education

Montclair State University

M.S. Computer Science

Montclair | Aug 2023 - May 2025

Shri Vishnu Engineering College for Women

B.Tech. Electronics and Communication Engineering

Bhimavaram, India | July 2018 - May 2022

Certification

- AWS Certified Data Engineer – Associate
- Google Data Analytics Professional Certificate.
- Salesforce Certified AI Associate
- IBM (via edX): SQL for Data Science
